BALTIC

DESCRIPTION

Baltic is inspired by the stones of northern European lands, focusing on the distinctive fractured faces of sedimentary rocks to give the surface a three-dimensional dynamism. The resulting effect is subtle and continuous, underlined by the uniformity of the colour scheme. This makes Baltic an ideal covering for interiors with a strong, austere yet also tasteful, appealing character.

INSTALLATION & MAINTENANCE

Baltic may be installed using standard ceramic tile installation methods and materials, as recommended by the Tile Council of North America (TCNA). An Architectural Ceramics sales representative will advise you on general installation questions.
