DESCRIPTION

Estonia is a collection of woods from different corners of the world; a series launched with the aim of collecting as many different kinds of wood as possible: a tribute to all the woods of the world. The collection currently comprises four woods from as many regions with different climates and geographical positions, making the start of a project that will be expanded over time with new plant species.

INSTALLATION & MAINTENANCE

Estonia may be installed using standard ceramic tile installation methods and materials, as recommended by the Tile Council of North America (TCNA). An Architectural Ceramics sales representative will advise you on general installation questions. Please note that ACI does not recommend grout joints smaller than 1/16" for ACI Stock material.
